

Making a listing as featured and un-publish it as draft.

This tutorial illustrates how can we turn a listing as “Featured Listing” to draw higher attention of visitor or sometimes we may need to un-publish a listing to stop visibility temporarily. We can do both easily through the Administration Panel in back-end. All you need is to log on to *Admin => Module => \$YourModule (f.e property, hotel, autos, tours etc) => Manage Listing* page where you will find the list of available listings you added so far.

Here is how you can set a listing as feature or un-publish as you need. The following images indicates how exactly we set the changes for property as featured or un-publishes :
